DEBIX SOM A

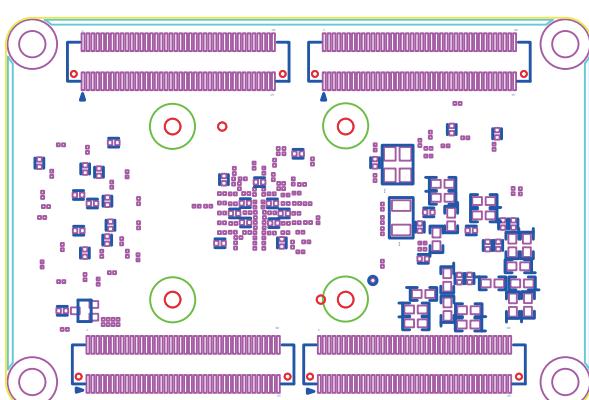

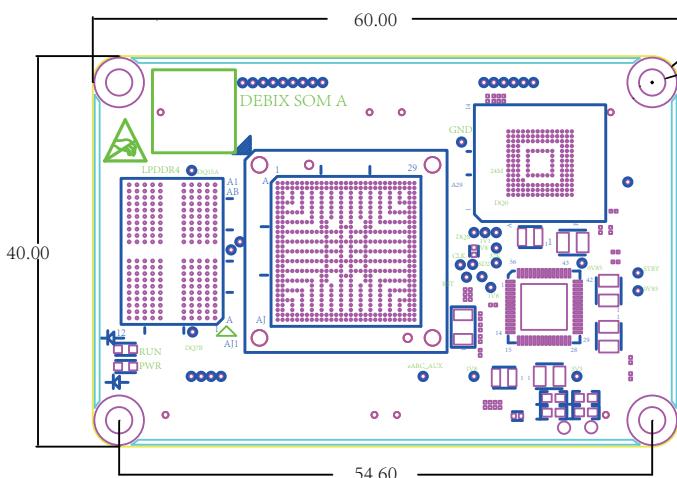

DEBIX SOM A i.MX 8M Plus Core Board

Overview:

DEBIX SOM A is the first System on Module product of the DEBIX series. As with the DEBIX Model A SBC, it is based on NXP i.MX 8M Plus CPU with a 2.3 TOPS NPU, which brings us the same powerful system performance. This core board design has some notable benefits, such as design reutilization, reduction of development time of the carrier boards, and flexible integration into various embedded systems.

Main Features:

- **Industrial-grade performance:** Designed for demanding applications in Industry 4.0, IoT, smart cities, and multimedia.
- **Comprehensive software support:** Includes Yocto-L6.1.22_2.2.0, Ubuntu 22.04, Debian 12, Windows 10 IoT Enterprise, Android, OpenWRT and FreeRTOS operating systems, along with basic software for fast and direct applications.
- **Real-time control:** Cortex-M7 core for real-time responsiveness, supported by robust control networks like CAN FD and dual Gigabit Ethernets (one with TSN capability).
- **Advanced vision system:** Dual Image Signal Processors (ISPs) and dual camera inputs for efficient image processing and analysis.
- **Advanced Multimedia:** 1080p60 video encode/decode (H.265/H.264), 3D/2D graphics acceleration, and multiple audio/voice functionalities.
