

ecspi_to_gpio_readme

1. DTS Modification

The file `ecspi1_2_set_to_gpio.diff` is a patch for modifying the device tree source (DTS). After applying the patch, replace the `/boot/imx8mp-evk.dtb` file on the device with the newly generated dtb file.

2. The GPIOs corresponding to ECSPi

Pin14	ECSPI1_SS0	GPIO5_IO09
Pin16	ECSPI1_MOSI	GPIO5_IO07
Pin18	ECSPI1_MISO	GPIO5_IO08
Pin20	ECSPI1_SCLK	GPIO5_IO06
Pin22	ECSPI2_SS0	GPIO5_IO13
Pin24	ECSPI2_MOSI	GPIO5_IO11
Pin26	ECSPI2_MISO	GPIO5_IO12
Pin28	ECSPI2_SCLK	GPIO5_IO10

3. Testing Method

Use `gpiod`.

- ◆ Install it with `apt install gpiod`
- ◆ Example: Control pin28 (ECSPI2_SCLK), which corresponds to GPIO5_IO10.
 - Set output high: `gpioset 4 10=1`
 - Set output low: `gpioset 4 10=0`
 - Read input: `gpioget 4 10`
